

Supported living and residential care

Our purpose is to improve lives. It's as simple as that. We help almost 5,000 people to live with independence in their local community. And we pride ourselves on helping every one of them to find the confidence and self-belief they need to follow their personal goals and dreams.

At Lifeways we support people living with a range of complex conditions, including profound and multiple learning disabilities, autism, sensory and communication impairments, acquired brain injuries, complex behavioural needs and mental health conditions. Everything we do is tailored to the unique needs of each individual, and every single day we strive to provide extraordinary support.

Our **supported living** offers modern, homely surroundings with high-quality support that fits seamlessly around each person's daily life, helping to build confidence and independence.

Whether it's learning a new life skill such as cooking or money management, having the confidence to take up a new hobby or make new friends, or taking a first step into volunteering or employment, we're here to support and encourage each goal, however big or small.

Feeling comfortable, happy and safe in your home is crucial to a person's wellbeing and development. We work closely with property developers in creating houses, apartments and bungalows that are specially designed to complement our support, enabling more independent living. We also partner with a number of housing associations to find suitable and affordable places for people to live, and we're on hand to help sort out tenancy agreements where needed. A selection of our homes are also fitted with assistive technology.

We know it's really important to be surrounded by people you enjoy spending time with, so where individuals express an interest to live with others, we support by finding suitable housemates with similar lifestyles and interests. Our homes are set in the heart of communities, meaning easy access to local amenities and attractions, along with having transport links close by.

- ✓ Carefully matched support teams
- ✓ Community settings
- ✓ Specially adapted housing
- ✓ Assistive technology available

Our residential care locations across the UK offer places for people with complex care and support needs to live in welcoming, supportive and stimulating environments.

These locations are suitable for people who will benefit from 24-7 specialist care and support.

Each home is designed carefully to keep the people we support safe and comfortable whilst helping them to build new skills. Many of our homes contain adaptations such as sensory rooms and ceiling track hoists, and some also have the use of assistive technology.

Each home provides residents with the opportunity to enjoy spending time with others in the communal living spaces and kitchen areas, with the privacy of their own bedroom with en-suite wet room or bathroom facilities.

Our homes are located throughout the UK in city and rural settings, all set within the heart of communities meaning they are close to local amenities and have excellent transport links. Each home complies with the regulatory requirements of the care commissions for England, Scotland and Wales.

“
Our sister looks very contented and is flourishing in her new home. All of the team helped make her transition a smooth and happy one.
